Summary

- **Purpose:** The Interservice Supply Support to Depot Maintenance Work Group is established to identify problems associated with Supply Support to Depot Maintenance, and develop long term solutions that will work for all services. The primary focus will be to find solutions that can be implemented quickly with the greatest improvement to mission readiness and return on investment.
- **Objective:** To improve interservice supply support to depot maintenance.

TEAM FOCUS

Materiel Management Team

- **Forecasting of repair parts to support depot level Consumables and Nonconsumables being repaired**
- **User Registration**
- **Prepositioning of repair parts**
- **“Rotable” (shop stock) Pool**
- **Nonavailability of Modification Kits and the requisitioning of parts to make Modification Kits**

Summary

- **Project Code 3AB**: Used for material shipments to a repair activity for REPAIR and RETURN as directed under existing agreements, including DMISA
- **Example: (AFSAC is Agent) FMS customer (Saudi Arabia) needs a DLR repaired (OO-ALC is Agent Depot and SOR) for Saudi Arabia's iteration of the F16**

Same part is tracked and returned!

DMISA
Requisition
Procedures

Summary

- **Project Code 3AD**: Used by depots to requisition other service peculiar parts through normal supply channels without incurring expense of user registration or off-line procedures, including DMISA
- **Example: AF needs Army to repair DLR**
 - Tobyhanna is Agent Depot & SOR
 - Breakdown of DLR uncovers Bit & Piece Part necessary to repair
 - Tobyhanna generates a requisition to SOS for **Bit & Piece part/s**

Requisition Procedures - Prj Code 3AD

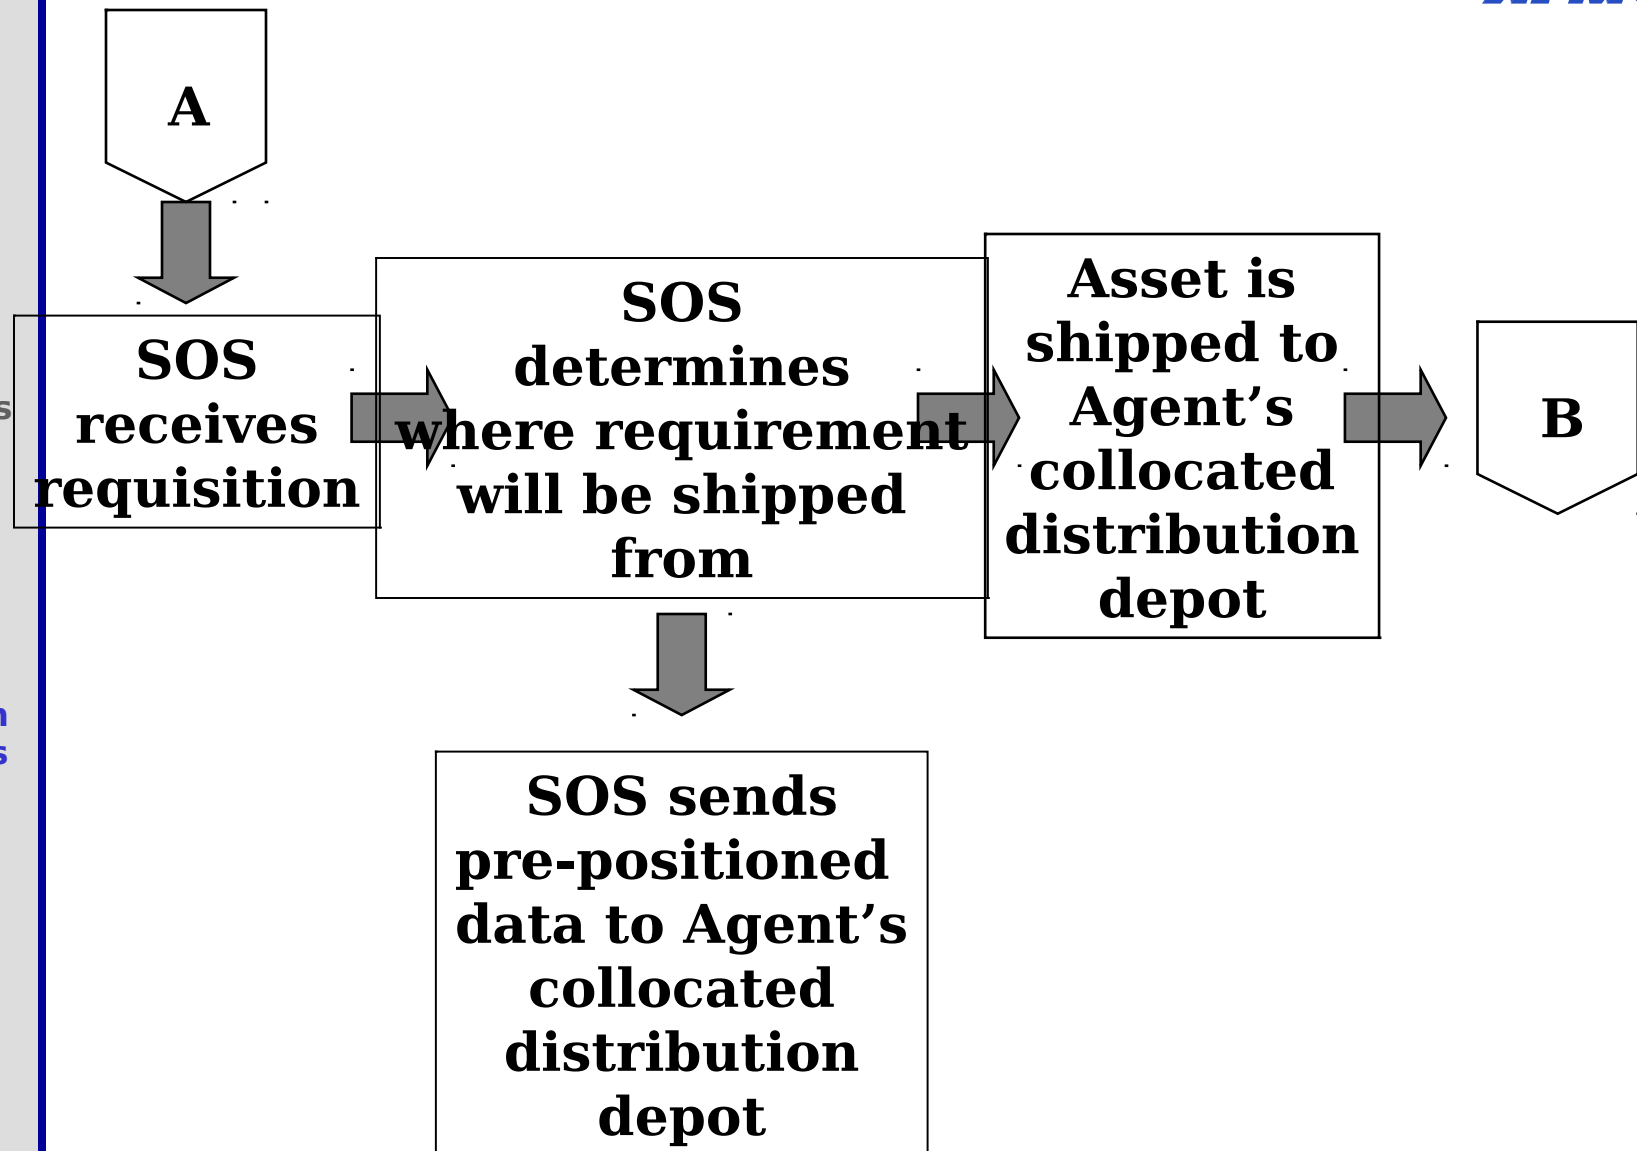

Note 1: Only register as having an interest in receiving the catalog data not as a user.

Note 2: Standard A0x procedures. Use MILSBILS fund code, signal code, and project code 3AD.
